Mr. Dave Liagre
U.S. Army Corps of Engineers
Louisville District
P.O. Box 59
Attn: ORLOR-R/Ron Waller
Louisville, KY 40201

Dear Mr. Liagre:

Summaries of the 1983-2009 gypsy moth trapping program conducted at four Army Corps of Engineers sites within the Louisville District are enclosed for your information (Table 1). Also enclosed are maps showing the trap locations at each site (Figures 1a-1d). The purpose of the trapping program is to monitor low-level gypsy moth populations and to help determine when more intensive survey methods should be employed.

Total trap catch at Clarence J Brown Dam increased from one male moth in 2008 to seven male moths in 2009. Zero gypsy moths were trapped at William Harsha Lake. Caesar Creek Lake and West Fort Lake increased from zero moths in 2008 to four moths and two moths, respectively. Based on these results, gypsy moth populations will not impact the forest resources at these Corps sites in the immediate future.

Also enclosed are Figures 2a-2d which show the 2009 gypsy moth Slow-the-Spread (STS) trapping results in Ohio. The inserts on each Figure show close-ups of the STS results in relation to the four Corps site properties. For more information regarding the STS program, visit http://www.gmsts.org.

It is important for Corps personnel to look for other gypsy moth life stages while performing their normal duties. Visit our GM web site located at http://www.na.fs.fed.us/fhp/gm/index.shtm for publications that are helpful in identifying the different gypsy moth life stages.

We would like to continue the trapping program at the same intensity in 2010. Thank you for your continued cooperation and if you have any questions regarding these results, please call Karen Felton at (304) 285-1556.

Sincerely,

Bob Lueckel

ROBERT G. LUECKEL
